EXPLORE

- How can we provide needed service without increased cost and time?
- Are needed resources already available?
- Who can we and who should we partner with?
- How do we build this into existing operations?
- How can we provide close loop communication to gain buy in?

A LEGO minifigure dressed as a firefighter stands in a snowy landscape. The minifigure is wearing a tan helmet with a red visor, a tan vest with black patterns over a white shirt, and blue pants. It is holding a wooden stick in its right hand and has its left hand raised to its forehead. The background is a soft-focus sunset or sunrise over a body of water, with warm orange and yellow light.
